

Random Image Code

```
{kl_php}

/*
 * Name your images 1.jpg, 2.jpg etc.
 *
 * Add this line to your page where you want the images to
 * appear:
 */

// Change this to the total number of images in the folder
$total = "3";

// Change to the type of files to use eg. .jpg or .gif
$file_type = ".jpg";

// Change to the location of the folder containing the images
$image_folder = "images/random";

// You do not need to edit below this line

$start = "1";

$random = mt_rand($start, $total);

$image_name = $random . $file_type;

echo "";

{/kl_php}
```
